emko | tech
INTERACTIVE SCREENS & INNOVATIVE SOLUTIONS

Make your lessons vibrant and engaging with interactive course content that you can create with various interactive educational tools and activities.

You can access the Class using the browser of any device connected to the Internet and start creating course content. You can create as much course content as you want from anywhere in the world, upload it to the cloud simultaneously, and access it right from your interactive screen.

SOFTWARE CLASS

Interactive Activities

In addition to various interactive games and activities, you can create impressive course content by using many different educational tools.

Category Mapping

Increase your students' participation in the course with the category matching activity that you can create immediately according to your course curriculum.

Group Contest

In this activity, where two or more students can participate, the person who clicks on the correct answer gains points and the highest score wins.

Fill In The Gaps

Especially with the gap filling activity that can be useful in your foreign language lessons, your students will learn and have fun.

Before The Class

Create course content through your web browser.

During The Class

Using the Emkotech Nova S3, directly access your course content from the cloud and start delivering your lessons.

Share from any device and easily mirror your screen.

SOFTWARE
SHARE

Thanks to the share application, the screen sharing and control features are now much stronger. With screen sharing, which is fully compatible with your MacBook, Windows, Chromebook, iOS and Android devices, you can share up to 9 screens of your device with your interactive screens at the same time.

Simultaneous Screen Sharing

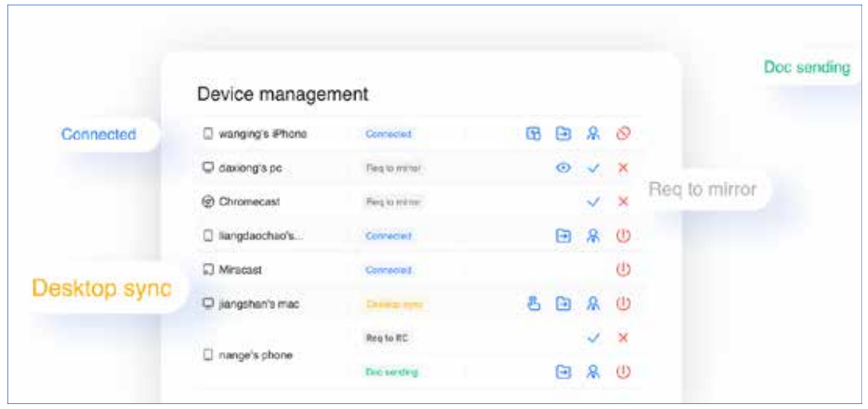
You can simultaneously and wirelessly project your own device's screen onto a interactive screen or instantly share videos, images, Word, PowerPoint, PDF files.

You can control Windows, Mac, and Chromebook devices on your interactive screen.

9 Screen Side By Side

You can simultaneously project up to 9 devices' screens onto your interactive screen at the same time.

Device Management



You can view all the devices that have sent a connection request to your interactive screen.

Interactive Screen Mirroring

SOFTWARE

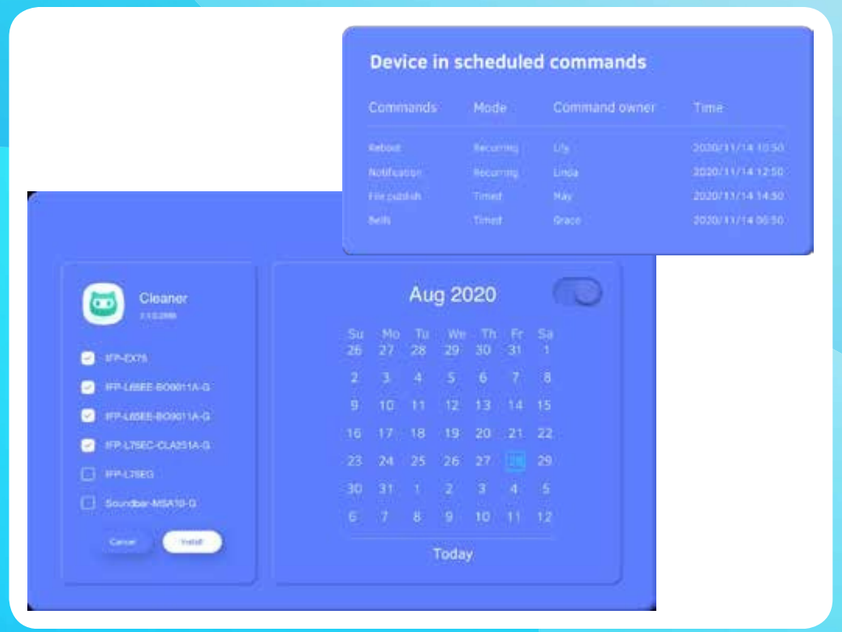
DMS

Thanks to DMS, you can remotely control and manage all your interactive screens at the same time through the web browser of any of your devices. With remote app installation, you can check and control the screens in your organization with a click like updating, screen closing and unlocking, announcement feature, screen lock and many different commands.

Send command

Wherever you are in the world, you can send any command you want to your interactive screens.

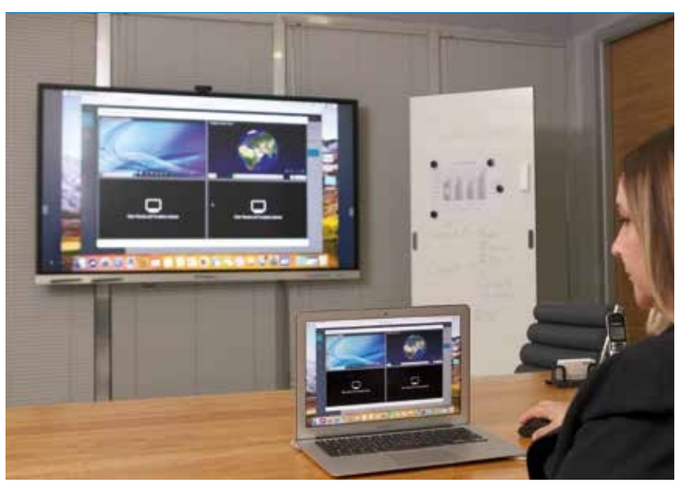
With the schedule option, you can select the date and time at which the command will be sent.



User Data

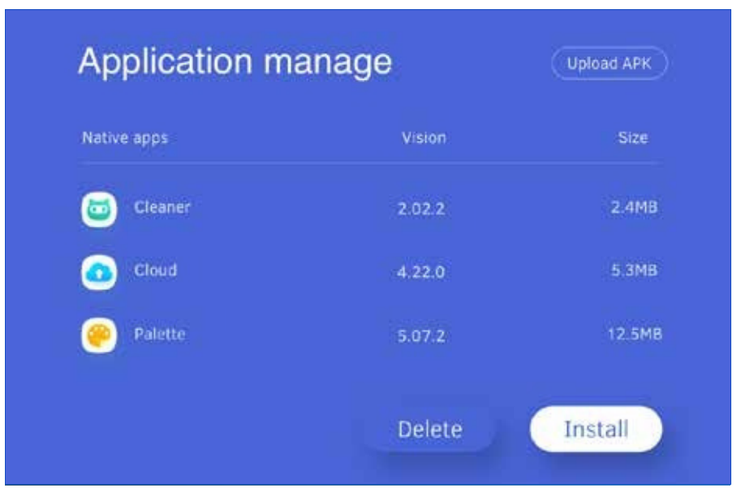
Display technical information for each device in a simple interface.
Collect and analyze statistics for useful insights or examine interactive screens for errors.

Remote Display Control



Remotely control all your screens with a unified interface. Manage all your hardware in one place and troubleshoot problems remotely.

Application Management



Activate, deactivate, install and update the applications you want on your multiple interactive screens with a single click with fast remote access.

emko | tech
INTERACTIVE SCREENS & INNOVATIVE SOLUTIONS

SOFTWARE
EMCONTROL

All your data is protected...

Thanks to the Emcontrol lock application, you can lock your interactive screen remotely, at any time, anywhere. Only the users you specify can log in to your interactive screen using their own mobile devices, and you can provide full protection against unauthorized access to your interactive screen.

3 ways to log in to your interactive screen

With Web Browser 1

You can log in to the control panel by entering your e-mail address and password with your web browser and you can lock or unlock all the interactive screens in your institution with a click.

Your interactive screen is fully protected with the one and only QR Code lock Android app.

2. With Mobile Apps;

You can log in by entering your e-mail address and password with the Emcontrol application that you can download from the Google Play Store or Apple App Store and you can log in to your interactive screen by scanning the QR code on your interactive screen with your Emcontrol application.

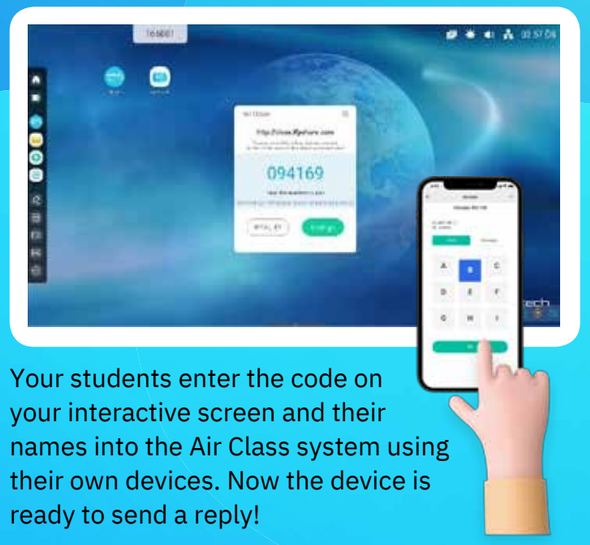
By Using Password Option 3

In case, if your devices don’t have an internet connection, you can unlock your interactive screen with an assigned password.

SOFTWARE
AIR CLASS

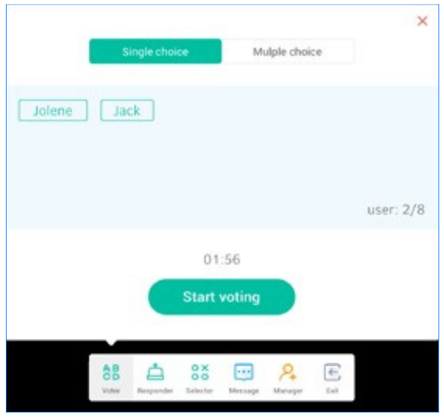
Thanks to the Air Class voting application, you can increase interaction in the classroom and keep your students engaged. Create multiple-choice, true/false, space filling and similar questions on your interactive screen, and have your students submit their answers using their devices. Immediately graph the results on your interactive screen.

Respond with Device



Your students enter the code on your interactive screen and their names into the Air Class system using their own devices. Now the device is ready to send a reply!

Simultaneous Tracking



You can simultaneously track which of your students have submitted their answers.

View Results

After all students submit their answers, you can graphically display the result on your interactive screen and create statistics of correct and wrong answers.

Automatic Student Selection

You can have the Air Class choose one your students randomly.

SOFTWARE
EMKO STORE

Our Emko Store application store, our Emko Store application store contains many different applications for educational and business purposes. Thanks to the application recommendation feature you can select from Emko Store, our application library is constantly growing. You can install and start using your favourite apps right away.

INTERACTIVE SCREENS & INNOVATIVE SOLUTIONS

edumarket

Designs that combine digital and analog systems...

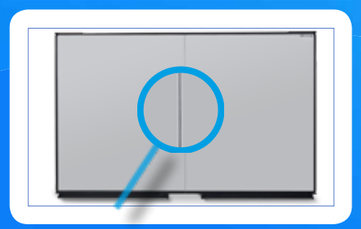
The short solution to narrow spaces with Emkotech Wings.

The most practical solution for using whiteboards is with interactive screens... Thanks to the writing boards that open towards the sides, either use together with the interactive screen or close the covers completely and use as a plain writing board.

SIZES	DESCRIPTION
65”	960 mm x 1540 mm/ 960 mm x 3080 mm
75”	1070 mm x 1760 mm/ 1070 mm x 3520
86”	mm 1210 mm x 2010 mm/ 4010 mm x 1210 mm

It is produced according to 65” - 75” - 86” Emkotech interactive screen size options.

Uninterrupted Writing Space



Easy Access to All Ports

Your Interactive Screen is Protected

4 More writing space for your education needs...

You can easily use both sides of the writing board on the side wings while working on the interactive screen. You can practically access all the outputs on the OPS computer from the side.

Enhance education by combining systems with Emkotech Wings...

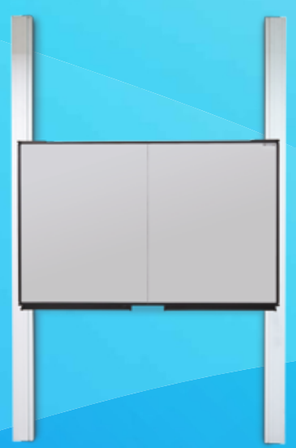
Closed State 1

Semi - Closed 2

Open State 3

use in either open or closed state.

You can combine it with Emkotech Emkotech Lift and height-adjustable systems.



CONCEPTUAL SYSTEMS

EMKOTECH

SLIDING SYSTEM

Double Sliding Board System

Expand your writing space with additional sliding and fixed whiteboards to your interactive screen. There are 2 fixed and 2 sliding whiteboards on each side of the interactive screen. The special double sliding system allows you to get uninterrupted writing space with its special frameless structure that combines sliding writing boards in the middle. Thanks to the special locking system located on the front of the sliding system, you can easily protect Emkotech interactive screens.

4x More writing space with a special double sliding board...

When the sliding whiteboards on the front of the sliding system are combined in the middle, the brake system slows down the boards and combines them. Thanks to this system, finger jamming and hard impact of the boards are prevented. Another fine detail is that when the boards are opened, a 2 cm gap is left between the case and the board to prevent finger entrapment and the boards from hitting the edge of the case hard.

CONCEPTUAL SYSTEMS

EMKOTECH

GUILLOTINE SYSTEM

GUILLOTINE SYSTEM

Activate education with a special guillotine board system...

Ideal for narrow spaces, the guillotine writing board system combines interactive screen and classic writing board. Get more writing space with a large surface whiteboard chart that can move up and down. The specially designed guillotine system saves space by using all the space on the wall with its up-down mobility, while eliminating the height difference.

You can hide and lock your interactive screen at any time by moving the whiteboard upwards.

Analog System

Digital and Analog System

Digital System

Ideal for use in both your classes and workplaces...

CONCEPTUAL SYSTEMS

EMKOTECH

LIFT

Practically move your interactive screen up and down to the desired size between 5 cm-95 cm from the floor. You can control it on your interactive screen with the remote control or the Emkotech Lift application.

You can eliminate the height difference with Emkotech Lift, which is designed according to 65”-75” -86” Emkotech interactive screens.

CONCEPTUAL SYSTEMS

EMKOTECH

MOBILE LIFT

Move it up and down or move it wherever you want...
Emkotech Mobile Lift will be an integral part of your team that will adapt to you.
Thanks to the braked wheel system on the special Mobile foot system, you can stop your interactive screen anywhere you want and use the Emkotech Lift application on your interactive screen to make the board move up and down on your screen.

With Emkotech Lift application, you can practically move your board up and down.

CONCEPTUAL SYSTEMS

EMKOTECH HEIGHT-ADJUSTABLE SYSTEM

Smart move from interactive screen...

Emkotech Height-Adjustable System, which brings movement to the interactive screen thanks to its special foot system, will eliminate the height difference with its up-down movement. Manual and motorized models are available on request.

By combining practical solutions with analog and digital systems, you can use Emkotech Height-Adjustable System and Emkotech Wings system together.

Manual

Motorized

You can eliminate the height difference with Emkotech Height-Adjustable System, which is designed according to 65”-75” -86” Emkotech interactive screens.

CONCEPTUAL SYSTEMS

EMKOTECH MOBILE STAND

It will allow you to move the interactive screen practically wherever you want...
